

IUCLID 5 Specialist Hosting

...award winning Specialist
Dedicated Server solutions...

“ IUCLID 5 stands for International Uniform Chemical Information Database and is the central tool for registering substances according to the REACH regulation. As such, it will impact the IT environments of all organisations that have to cope with the data submission requirements of REACH and other programmes (OECD HPV, EU Biocides and others).

The question is do you install IUCLID 5 on your company network, or do you outsource the operation to a specialist service provider?

Installing an in-house IUCLID server often involves a high level of financial and personnel expenditure – the outsourcing route is a simpler approach which negates the need for investment in specific infrastructure, hardware and software.

Netwise Hosting is pleased to offer such a service via its specialist hosting platform which has been designed, secured and monitored for IUCLID from the ground up.

INTRODUCTION

We offer a comprehensive hosted IUCLID 5 environment, housed on a dedicated UK server. This provides an end-to-end submission platform that will enable you to efficiently meet your REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) requirements, and those of other regulatory programmes (including OECD HPV, EU Biocides).

The service includes a right-sized, scalable dedicated server solution, hosted in a private UK data centre, running the latest Microsoft Windows Server 2008 R2 platform and fully secured for maximum protection.

INCLUDED FEATURES

Plug-in and update installations	Migration from previous systems
World-wide secured database access	Scalable, pay-as-you-grow database space
Online, offsite backup services	Firewall protected servers

OPTIONS & PRICING

The below solution allows you to remotely access, through any web browser, a secure connection to your shared IUCLID environment – whether at work, home or on the move. All services include nightly backups, regular maintenance checks and the installation of updates and plugins as and when they become available; meaning no hidden costs.

Primary IUCLID Instance	Additional IUCLID Instance
£150 / month	£125 / month
€170 / month	€140 / month
Backup, migration and verification from previous system: £200 (€225)	Backup, migration and verification from previous system: £100 (€115)
Domain name for web access: £25 / year	Domain name for web access: £25 / year
